

SCHEDULE OF THECHNICAL INFORMATION
(INFORMATION TO BE SUPPLIED WITH TENDER)

18.capacitor bank

a:CAPACITOR

item	Description	TECHNICAL PARTICULARS
1	Manufacturer	PKC
2	Type of capaciotor	PK400/11.56 EDRI
3	Number of capacitors in parallel	7
4	Number ov capacitors in series	8
5	Application standard	IEC 871
6	Assigned rated current ----- amp	34.61
7	Assigned rated voltage ----- kv	11.56
8	Assigned rated output ----- kvar	400
9	Norminal capacitance ----- μ f	9.53
10	Variation in capacitance due to temperature variation (percent with respect to value at reference ambient temperature) a)At lowest ambient temperature ----- % b)At upper limit of ambient temperature ----- %	<1% <1%
11	Nominal rated voltage of elements ----- V	1445
12	Element constuction a)eletcorode b)solid dielectric c)impergnant	Aluminium foil polypropylen film jarlyc c101 PCB free

SCHEDULE OF THECHNICAL INFORMATION
(INFORMATION TO BE SUPPLIED WITH TENDER)

18.capacitor bank

a:CAPACITOR

item	Description	TECHNICAL PARTICULARS
13	a)minimun dielectric strenght ----- v/m b)maximum dielectric stress at rated voltage ---- v/m	61kv/mm 65kv/mm
14	Number of elements connected in series and/or parallel per phase	56
15	Details of fusing arrangment and whether internal or external (current time characteristic of fuses to be provided)	EXTERNAL FUSE
16	Minimum breakdown volage of individual elements ----- V	1.14*Un
17	Details of mineral oil for impregnating medium	jarlyc c101 PCB free
18	Detail of alternative impregnating medium	Benzylated toluene & Dibenzylated toluene
19	Total losses at reference ambient temperature, at rated volage and frequency ----- kw	0.048
20	total losses at lowest ambient temperature, at rated volage and frequency ----- kw	0.02
21	total losses at upper ambient temperature, at rated volage and frequency ----- kw	0.06
22	total weight of complete capacitor including all fittings and impregnating medium ----- kg	69

SCHEDULE OF THECHNICAL INFORMATION
(INFORMATION TO BE SUPPLIED WITH TENDER)

18.capacitor bank

a:CAPACITOR

item	Description	TECHNICAL PARTICULARS
23	Detail of fitting and parts detached for transport	6 hongers on sites
24	Weight of complete three phase capacitor bank arranged for transport a)total ----- tones b)heaviest packages ----- tones	2000kg 600kg
25	Material of tank or container	stainless steel
26	thichness of tank or container a)sides ----- mm b)bottom----- mm c) details of overall finish (including method of cleaning, primary and finishing paints)	1.5 1.5 60µm primary 60µm finishing
27	Type of connector at H.V terminal of coapacotor bank	NUT(M16)
28	Type of connector at nutral end of capacitor bank	NUT(M12)
29	Insulation level between terminal and container: _ impulse withstand----- kv peak _ Power frequency withstand ----- kv rms	170 70
30	Creepage distance -----mm	762
31	a) Resistance of discharge resistor ----- ohm b) Temperature category	10900kohm 40/D
32	Container hottest spot temperature rise above ambient at rated powe ----- C	At rated operation the temperatare rise of the case is +8 to +10 in shadow
